Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

Jon Andoni Duñabeitia Ph.D. is a researcher in cognitive neuroscience who currently works as a scientist at the Basque Center on Cognition, Brain and Language (BCBL). He is also a member of the Masters panel at the University of the Basque Country. Dr. Duñabeitia currently leads the research group "Multilingual Literacy" at the BCBL, whose aim is to understand the cognitive processes associated with the acquisition of oral and written languages in monolingual and multilingual populations of different ages. His main research interests focus on the study of the neurobiological substrates of multilingualism and reading throughout the life cycle.

Since Dr. Duñabeitia began his research career, he has published more than 70 articles in the main international scientific journals, demonstrating his maturity, solvency and scientific independence. In recent years, Dr. Duñabeitia has been a member of the editorial board of the Journal of Cognitive Psychology and guest associate editor in the journals Frontiers in Psychology and Quarterly Journal of Experimental Psychology, leading the initiative of special monograph volumes. In addition, he has written several book chapters, and he has published several articles in non-specialized magazines of wide scope.

Dr. Duñabeitia has demonstrated his research maturity by acting as Principal Investigator in several research projects financed externally in public calls, thus certifying his ability to attract capital investments. The Basque Government financed two of his scientific projects in 2012 and 2015, and in 2011 he was granted financial aid for the acquisition of scientific material. The Provincial Government funded one of his projects in the 2016 call, and the Government of Spain funded two of his projects in the 2012 and 2015 calls. Besides, Dr. Duñabeitia takes active part of the research team of different international projects funded by different agencies. Dr. Duñabeitia has also spent much of his time actively contributing to local, national and international scientific meetings by presenting a large number of posters and talks in the most recognized specialized forums in the field. He has also been the invited speaker at various European, Asian and American universities and at several international conferences. He collaborates as a reviewer in more than 35 different international journals in the field too, and he is a member of the board of the Spanish Society of Experimental Psychology (SEPEX). He is committed to helping with scientific diffusion in non-professional forums and to making scientific discoveries and project results accessible to the general audience. He has appeared repeatedly in different local, national and international media presenting his scientific activity, and he has been the guest speaker in numerous conferences for the non-expert public in different Spanish provinces. As a consequence of all this, in 2016 the BBVA Foundation recognized his work awarding him a prize as Researcher and Cultural Creator.

Dr. Duñabeitia collaborates actively with some of the most recognized researchers in the field of experimental psychology and cognitive neuroscience, and he is an international reference in this field. At present he has been included in the ranking of the Spanish experimental psychologists with the greatest international scientific impact.
